

The Electrical Association of Philadelphia

presents

One and Two Family Dwellings Electric

Friday, November 16, 2018

About the Class: One and two family dwellings is a way of life for many contractors. This course will cover any electrical wiring or system in a residential unit. This presentation will focus on the requirements for electrical installations in one- and two-family dwellings. From the service through to the branch circuits and devices, this comprehensive program covers every aspect of residential installations. Topics include services, cabinets, ampacity, calculations, grounding & bonding, grounding electrode systems and conductors, feeders, branch circuits, terminations, AFCI & GFCI requirements, receptacle locations, and wiring methods.

You want to be a residential expert? Sign up for this class to make sure you get the correct information and get the resources to get your questions answered as you further your career. This program utilizes the 2014 NEC One- and Two-Family Dwelling Electrical Systems Power Point Program from the International Association of Electrical Inspectors.

About the Instructor: Mike is the Senior Electrical Inspector, Middle Department Inspection Agency, Inspector for new residential, commercial, and industrial electrical installations, power distribution systems, lighting and control systems, fire alarm and fuel dispensing systems, and existing electrical systems. Mike has an excellent ability to mentor others and possesses an in-depth knowledge of the National Electrical Code & UL White Book. Expert witness for several legal cases.
