

Spring 2010

Dear Valued Customer:

Thank you for your interest in The Electrical Association of Philadelphia's (EAP) Spring 2010 Rebate Program, which can save you up to \$800! (or Energy Tax Credits which might also be available – see below). Select members of The Electrical Association of Philadelphia's Heating and Air Conditioning Section are participating in our Spring Rebate Program to make it easier for you to benefit from a heat pump or high-efficiency central air conditioning system. Here's how the rebate works:

To qualify, you **must** work with a participating contractor & manufacturer to install one of the following: (see below)

Rebates will be offered on full central air conditioning or heat pump systems only (outdoor unit, fan-bearing unit, and coil – manufacturer approved matches). Add-on coils only are not eligible for a rebate.

- **ENERGY STAR<sup>®</sup> Residential High Efficiency Equipment (Manufacturer Approved Matches)**  
\$300 on a 14.5 to 14.99 SEER, 8.2 HSPF, 12.0 EER (or higher) heat pump system  
\$300 on a 14.5 to 14.99 SEER, 12.0 EER (or higher) central air conditioning system  
\$500 on a 15.0 to 16.99 SEER, 8.2 HSPF, 12.0 EER (or higher) heat pump system  
\$500 on a 15.0 to 16.99 SEER, 12.0 EER (or higher) central air conditioning system  
\$700 on a 17.0 or higher SEER, 8.2 HSPF, 12.0 EER (or higher) heat pump system  
\$700 on a 17.0 or higher SEER, 12.0 EER (or higher) central air conditioning system  
\$800 on an 18 EER geothermal heat pump system (or higher)
- **Additional \$100 on a dual fuel heat pump (hybrid) – Minimum 14.5 SEER, with manufacturer recommended controller. This is NOT a separate rebate.**
- **ENERGY STAR<sup>®</sup> Small Commercial (1-5 ton) High Efficiency Equipment**  
\$300 on a 14.0\* SEER, 11 EER, 8.0 HSPF or higher heat pump or A/C packaged system  
\$300 on a 14.5\* SEER, 12 EER, 8.2 HSPF or higher heat pump or A/C split system
- The contractor will subtract the rebate from your contract and final invoice, dependant upon the equipment you choose.
- (Please see the system requirements above for details). *Please be sure this figure is included on your contract and invoice, or your rebate cannot be guaranteed. **NOTE: PECO Home ENERGY STAR Rebates can be combined with this rebate.***
- Rebates will be offered on *full heat pump or central air conditioning systems*. For **heat pump systems**, this means that both the outdoor unit and indoor air handler must be replaced. For **central air conditioning systems**, this means that the outdoor unit, indoor fan-bearing unit/furnace, and coil must be replaced. *Add-on coils only are not eligible for a rebate.*
- Contact participating contractors and manufacturers/distributors in the program (see below).
- Prior to signing the participating contractor's work agreement, be sure to **request a claim form** indicating that you would like to receive this rebate. **ONLY** participating contractors will have these forms.
- ***This offer is only valid from Monday, February 1, 2010 — Friday, May 14, 2010. All work must be completed during this time frame. Contracts must be signed on or before Friday, May 14, 2010 (deadline). All systems must be installed by Friday, May 28, 2010.***

#### Monthly Payment

- Financing or "Energy Loan" Financing may be available. Ask your contractor.
- **THIS OFFER IS NOT VALID IN COMBINATION WITH OTHER MANUFACTURER PROGRAMS, OR ON NEW CONSTRUCTION.**

If you have questions, please contact The Electrical Association of Philadelphia at 610-825-1600 or at [electric@eap.org](mailto:electric@eap.org). The staff will be glad to clarify any of the program requirements for you. See below to answers to some common questions regarding the program.

This program is conducted by The Electrical Association of Philadelphia. PECO Energy does not receive any payments in connection with the program, and its involvement is limited to making information about the program available to their customers. Neither PECO Energy nor The Electrical Association of Philadelphia warrants or guarantees the work of participating contractors or equipment sold in any way, nor has either PECO Energy or The Electrical Association of Philadelphia inspected, tested, or qualified the equipment sold under the program.

## FREQUENTLY ASKED QUESTIONS

**1. Q: Am I eligible for your rebate by installing a window unit?**

**A:** No. Only ENERGY STAR<sup>®</sup> Residential central air conditioning systems with a minimum SEER of 14.5, installed by a participating contractor, using a participating manufacturer's equipment (manufacturer approved matches) qualify for our rebate.

**2. Q: Can you please send me an application to get my rebate?**

**A:** No. Your rebate must be obtained through the contractor you select to do your work. (Please see the enclosed list)

**3. Q: Where can I purchase the air conditioner or heat pump to receive the rebate? I (or my friend or relative) can do this work.**

**A:** You cannot purchase this directly. Your air conditioning or heat pump system must be purchased and installed by the participating contractor you select, and he/she will take the rebate off of your bill.

**4. Q: What is HSPF?**

**A:** HSPF stands for Heating Seasonal Performance Factor. This measures the efficiency of the heating portion of the heat pump. A higher number means the unit works more efficiently.

**5. Q: What is a heat pump?**

**A:** A heat pump combines cooling and heating capability in one unit. When cooling, the heat pump operates like an air conditioner, removing the heat from indoors and transferring it outdoors. In the winter the heat pump takes heat from the outdoors and transfers it inside your home. Even at freezing temperatures, there is still heat in the outdoor air that can be used to warm a home by using a heat pump. To augment the heat pump on very cold days, electric resistance heaters are installed in the indoor section of the unit.

**6. Q: What does SEER mean?**

**A:** SEER stands for Seasonal Energy Efficiency Ratio. It is a comparison of the amount of cooling (BTUs) a unit produces, divided by the amount of electricity (watts) it consumes. The result is averaged over an entire cooling season to make it more accurate. The higher the SEER, the better the efficiency of the unit.

**7. Q: What is the benefit of a high efficiency unit?**

**A:** It is important to note that while higher efficiency units will drastically cut the cost of operation, they generally do not heat or cool any better than standard efficiency units. Several different grades of air conditioner, heat pump, oil furnace, or gas furnace may be available as options for your new heating and/or air conditioning system. It is important to remember that in most cases a higher efficiency unit will not heat or cool any better than a standard efficiency unit. They merely do it at a reduced cost. There are some side benefits to high efficiency units, however. High efficiency air conditioners and heat pumps are usually quieter and may have better warranties than standard units. High efficiency gas and oil furnaces also reduce the drafty feeling in a home by using outdoor air for combustion. Most also have a lifetime heat exchanger warranty. As far as how much energy the unit will save, it depends on several factors. Most, however, will save significantly more than their cost over the lifetime of the unit.

## **Information for Tax Credits/Low Interest Loans**

### **December 16, 2009**

#### **Federal Income tax credits**

Note!! May qualify for Federal tax credit of 30% of the entire project\* for high efficiency units meeting the following minimum levels. Air Cond: 16.0 SEER, 13.0 EER, Heat Pump: 15 SEER, 12.5 EER, HSPF 8.5, Geothermal CL: 14.1 EER, 3.3 COP, Geothermal OL 16.2EER, COP 3.6, Gas Furnaces: 95% AFUE, Gas & Oil Boilers 85% AFUE \*up to a cap of \$1500.00. Note: no cap for geothermal. Program effective 1/1/09. Ends 12/31/10 for conventional and 12/31/16 for geothermal.
